SMARTCONNECT
MODULE

THE SMARTCONNECT MODULE PROVIDES SECURE INTERNET ACCESS TO YOUR WEB ACCESSIBLE REMOTE CONTROL EQUIPMENT.

Ready to go out of the box!

We customize and configure each device to your specific equipment needs.
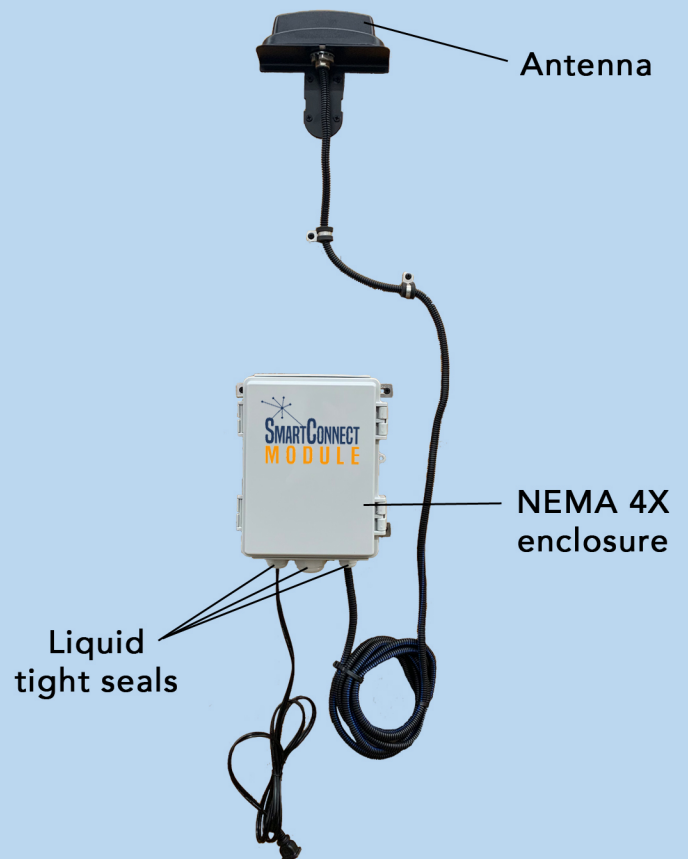

Data Software Solution

CDCE, Inc. provides cost-effective, pooled monthly data plans for IoT data applications. Monthly data plans includes managed services, set up, configuration, deployment and support within the cloud based software manager.

Hardware Solution

CDCE, Inc.'s SmartConnect Module is ready to go out of the box. The NEMA 4X rated enclosure is built to offer a superior level of protection from corrosive and extreme environments. The rugged enclosure houses the network components that allows communication to your software solution. The outdoor rated MiMo antenna provides enhanced signal performance for most coverage challenged locations.

Optimized for deployment in industrial-grade applications including energy, utilities, smart city and water management. The SmartConnect Module allows a secure communication to your software solution.
